Regarding extension of Exemption No. 2528K

Dear Sirs:

Kenmore Air Harbor requests an extension of Exemption No. 2528K from Part 135.203 (a)(1), of the Federal Aviation Regulations (FAR) which permits Kenmore Air Harbor to conduct operations in seaplanes under visual flight rules (VFR) outside of controlled airspace, over water, at altitudes below 500 feet.

Kenmore states that the circumstances and conditions, in regard to safety and public interest, which warranted the original and 11 subsequent extensions of this exemption, continue to exist. Kenmore has operated successfully under this exemption since 1978 without incident or accident of any nature.

Kenmore additionally requests that the renewal of this exemption not be delayed by publishing in the Federal Register and states that this will not set a precedent.

Your timely extension of this exemption, which expires on March 31, 2003, will allow us to continue to provide safe, efficient and timely service to the traveling public.

Your assistance in this matter is appreciated.

Sincerely,

KENMORE AIR HARBOR, INC.

Gregg Munro
